Certified Point of Sale Solutions	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Certified Hosting Providers		<input type="radio"/>	

How it Works.

The Trident Payment Gateway utilizes the Internet to provide a simple and secure method of processing credit card payments.

By sending an HTTPS POST with minimal transaction information to the payment gateway, a merchant can avoid the complex transmission protocols and message formats unique to the credit card payment industry networks. Trident not only simplifies the procedure, but manages the ongoing process of change resulting from credit card association requirement updates.
